

PATHODOCTM

Funded by the
European H2020 PHC10

Developing a *“new method
for fast and cost effective
diagnosis of life-threatening
diseases”*

*Rapid testing for multiple
pathogens and resistance
genes in single samples*

Developed for **testing one sample per run**

Offers

- DNA Extraction
- PCR Cycling
- Multiplex Microarray Assay

The Prototype is **currently under development**
We welcome any feedback and expressions of
interest/ applications.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 634137
